

Tilt-Con Awarded 2009 TCA Robert Aiken Innovation Award

Tilt-Con Corporation was recently awarded the **2009 TCA Robert Aiken Innovation Award**. The award was based on the merits of what is arguably the next generation of extreme tilt-up in the total site cast approach to parking garages. Although parking garages for the last five years have been constructed using tilt-up panels around the perimeter, most have continued to employ prestressed, CIP or steel deck structures and interior supports. This project delivered an immensely successful total precast (site cast) approach to a parking garage that achieved exceptional quality and performance without a single piece of plant-manufactured or vertical cast concrete. This is a new frontier that continues the evolution of the tilt-up contractor as the premier craftsman and the design engineer as the innovative spirit.

Recent Tilt-Con Innovative Projects

Boca Village Corporate Center

The Boca Village Corporate Center, a class A four-story office building atop a three-story parking garage, sets a new standard, being the first LEED-certified development in the heart of Boca Raton. The GREEN building features flexible floor plans, covered parking, special landscaped terraces and storm resistant construction. With immediate access to I-95, Tri Rail and Boca Raton Executive Airport, this project is an ideal business location.

1800 Military Trail Parking Garage

1800 Military Trail Parking Garage is a four level 174,000 square-foot parking garage. The project, consisting of 543 parking spots, is ideally situated just minutes from Interstate 95, Florida Turnpike, Town Center Mall, Lynn University, Florida Atlantic University, Boca Raton Community Hospital and has convenient access from north and south bound Military Trail. The location is also surrounded by upscale shopping and food market venues, luxury residential enclaves and top rated public and private secondary schools.
